9. ☐ Other \_\_\_\_\_.

The following is an examiner's statement of reasons for allowance:

With regard to applicants particle size, it is the position of the examiner that those skilled in the art would interpret applicants "average particle size" to mean number average particle size. Note in particular Katano at paragraph 49, Vinci at column 7, lines 36-46 and Miyatake at column 19, lines 29-35 AND Vinci at column 7, lines 36-46 which all disclose that scattering including using NICOMP analyzers (such as is used by the instant specification) techniques yield number average particle sizes.

The instant claims require a specific combination of specific amounts of a minimum of 5 different materials (components "1"- "5") for which the prior art does not fairly teach or suggest. In contrast to the claimed invention, Leis merely disclose applicants' polymers from a list of many and discloses that such polymers are present "individually or in mixtures". Furthermore while Swoboda discloses addition of a "hard component", the hard component is narrowly defined a column 7, lines 34-column 8, line 20 and does not encompass a mixture of components 3-5 and in fact Swoboda even discloses that if AMS/acrylonitrile is used with styrene acrylonitrile (a fairly similar polymer pair) that the acrylonitrile contents should be matched closely and requires a very narrow range of intrinsic viscosity and thus it is clear Swoboda does not contemplate use of hard components outside the disclosed genus and those skilled in the art would fairly conclude hard components not encompassed by the disclosed genus of Swoboda would not be likely to work and in fact it is surprising that Leis refers to may of his "hardening components" as such since a number of them (including those required by the instant claims) would not generally be viewed in the art as entirely hard

components. Lastly the concentration of the hardening copolymers of Leis (which may encompass applicants components 3-5) is taught to be in a minority up to a non preferred ratio of 1:1 while in Swoboda "hard component" "C" is implied to not be in a minority at column 8, lines 40-45.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
